PROFESSIONAL EXPERIENCE

Service.ly / Tampa, FL

Frontend Software Engineer

April 2023 – Current

- Developed and deployed high-impact features to enhance digital media management and user experience using React and NextJS.
- Played a key role in the frontend architecture redesign, significantly improving performance metrics such as load times and interaction latency.
- Collaborated with cross-functional teams to ensure high-quality releases, integrating user feedback to drive product iterations.

Gods & Titans NFT / Remote

Frontend Developer

January – October 2022

- Engineered a decentralized application (DAPP) with immersive 3D interactions, utilizing React and third-party web3 APIs to enhance user engagement.
- Implemented robust cloud functions for secure blockchain transactions, enhancing the reliability and security of user interactions.
- Designed user-centric dashboards for managing blockchain assets, significantly improving the user interface and experience.

TYGR NFT / Remote

UI Designer / FrontEnd Developer

January – April 2022

- Developed and maintained the frontend UI, ensuring alignment with the technical requirements and brand vision.
- Optimized web interfaces under tight deadlines, contributing to the project's success through innovative design solutions.
