Summary

As a creative software developer with 4+ years of experience, I specialize in leveraging React and other tools to design and develop responsive websites, mobile applications, and interactive features that have consistently driven business growth and enhanced user experience. With a proven track record of utilizing my full-stack knowledge and expertise to build scalable, interactive, and user-centric applications, I am confident in my ability to deliver exceptional results that exceed expectations.

Relevant Experience

Senior Coach @ theCoderSchool
Sept 2020 - Present // Tampa, FL

- ▷ Provided guidance and hands-on instruction to students in the development of software projects ranging from games to mobile applications, contributing to the growth and success of the technology industry.
- ▷ Created customized development plans for student software projects, resulting in the timely and efficient delivery of high-quality work, empowering students to achieve their goals in software development.

Full-Stack Developer @ Gods & Titans NFT
Apr 2022 - Nov 2022 // WFH

- ▷ Developed a web3 DAPP that showcases multiple immersive 3D applications, delivering a next-generation user experience and paving the way for new possibilities in decentralized applications.
- ▷ Implemented cloud functions to facilitate secure transactions between crypto wallets and Ethereum smart contracts, streamlining the user experience and enabling efficient, reliable, and secure interaction with the blockchain.
- ▷ Designed and engineered a cutting-edge dashboard that provides a user-friendly interface to manage walleted NFTs, leveraging third-party web3 APIs, and empowering users to interact with the blockchain in innovative ways.

UI Designer / Front-End Developer @ TYGR NFT
Jan - Apr 2022 // WFH

- ▷ Designed and developed UI that helped establish and reinforce the project's identity, and delivered high-quality results while operating under tight time constraints, effectively driving project success.
- ▷ Conducted rigorous testing to ensure cross-browser compatibility and mobile responsiveness, resulting in increased accessibility and enabling the project to reach a wider audience.
